

PROMINENT NEW YORK MAN PRAISES TANLAC

John F. Hyatt, of Albany, N. Y., Is Relieved of Severe Attack of Rheumatism of Many Years' Standing.

"I am now seventy-two years old and am just getting rid of a fifteen-year case of rheumatism that had me so crippled up I could not walk," said John F. Hyatt, 227 Pearl St., Albany, N. Y., in relating his remarkable experience with Tanlac, recently. Mr. Hyatt was chairman of the committee in charge of building the Albany County Courthouse and was four times elected a member of the County Board of Supervisors. At present Mr. Hyatt is Assistant Superintendent of the Albany County Courthouse, with offices in the building.

"I don't believe," he continued, "anybody could have rheumatism any worse than I did, and my case was of such long standing I didn't expect to ever get over it. I was unable to walk except for a short distance, supported with a cane, and even then the pains struck me every time I took a step. My legs, hips and ankles hurt something awful and my joints were stiff and achy. I couldn't cross my leg without having to lift it up with my hands and to turn over in bed, why, the pains nearly killed me.

"My appetite was gone and the sight of food nauseated me. My stomach was out of order, and I had a sluggish, heavy feeling all the time. I was weak, off in weight and discouraged so that it looked like I might as well quit trying to ever get well.

"I had no idea Tanlac would relieve my rheumatism when I began taking it last Spring. I took it because I saw where it would give a fellow an

JOHN F. HYATT
227 Pearl St., Albany, N. Y.

appetite. Well, sir, I was the most surprised I ever was in my life when the rheumatic pains began to ease up. I took seven bottles in all and, it's a fact, I didn't have an ache about me, was eating fine and simply felt like I had been made over again.

"I have been in the best of health ever since, with only a slight twinge of rheumatism at intervals. I do not need my cane now, but as I had been unable to walk without it for several years, I got into the habit of carrying it and so still take it along. I am enjoying life and health once more and can conscientiously recommend Tanlac as the greatest medicine I have ever run across in all my experience."

Tanlac is sold by leading druggists everywhere.—Adv.

INCREASE YIELD OF GARDEN SOIL

Only Well-Rotted Manure Should Be Applied as Top Dressing in the Spring.

ADD SOME NITRATE OF SODA

Several of Solid Crops Require Plenty of Nitrogen for Leaf Growth—Application of Lime Has Decided Advantage.

(Prepared by the United States Department of Agriculture.)

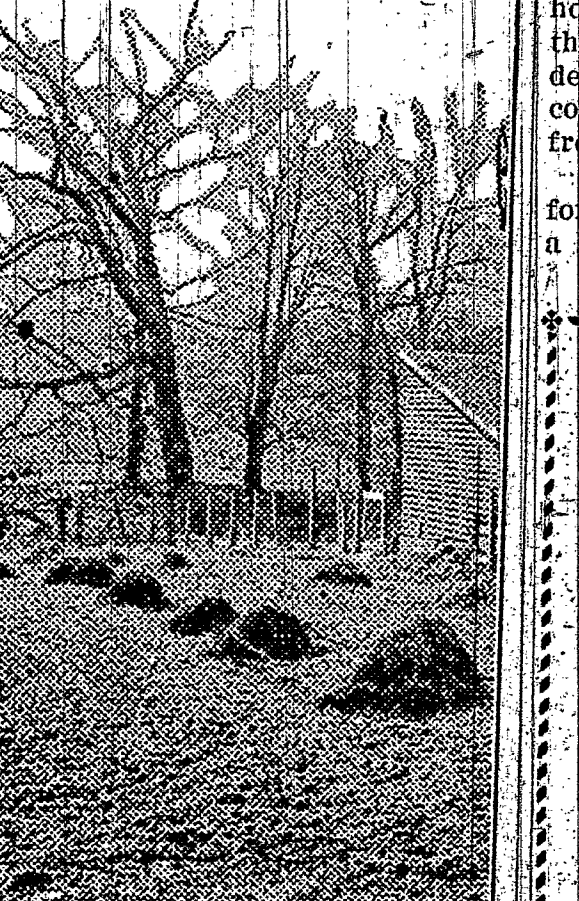

Nothing equals plenty of stable or yard manure to make a garden plot produce the best crops. Garden specialists of the United States Department of Agriculture mean by this not merely a meager scattering over the surface, but an application about two inches thick. It should be applied in the fall to form a protecting cover during the winter. If this is done, the manure should be turned under as early in the spring as possible, but any material too rough to turn under should be piled in a compost heap to rot. Only well-rotted manure should be applied in the spring as a top dressing. After the land has been plowed, scatter the rotted manure over the surface and work it in with the harrow. If the garden is spaded the manure should be worked in with a spading fork or rake.

Elements Sometimes Deficient.

Large quantities of manure should be used. On a tenth-acre garden, this is one measuring about 43½ feet by 100 feet, apply from one to two tons—two loads—in the fall. If a tractor is used for hauling one load generally will be sufficient. If a corresponding amount is piled up in the autumn, with a little sp. or soil mixed with it, and worked over once or twice during the winter, it will give a good supply of compost for use as a spring top dressing.

Where this amount of manure is used very little chemical fertilizer is needed. However, manure very often does not have a sufficient quantity of nitrogen, phosphoric acid and potash in it, and it may be desirable to add commercial fertilizers containing 2 or 3 per cent nitrogen, 3 or 10 per cent phosphoric acid and 3 to 6 per cent potash, at the rate of 100 pounds on a tenth-acre garden. This also can be spread broadcast and worked into the soil when the land is being pulverized ready for planting.

Several crops require special fertilizers. For instance, lettuce, cabbage, spinach, kale, and in fact all of the salad crops, and those which are grown

Heavily Manured Garden Means Increased Production.

for greens, need plenty of nitrogen to make leaf growth. These crops might well be stimulated during their growing period by a little nitrate of soda, not exceeding ten pounds on a tenth of an acre at any one application. The applications should be at least three weeks apart. It should not be applied within six inches of the plants or in too large quantities, or burning will follow and injure the plants. Fruits and crops like beans, peas and corn, that are grown for their seeds, need plenty of phosphoric acid. Root crops, as potatoes, carrots and beets, require plenty of potash.

Many gardens are improved by applications of lime. However, it may injure Irish potatoes, for lime provides a disease to which they are susceptible. Except on land to be planted in potatoes, lime applied once every three years at the rate of 200 to 300 pounds on a tenth-acre garden will be a decided advantage. It helps to sweeten the soil, thus making it more suitable to crop production, and it makes heavy clay soils lighter and easy to cultivate.

"Green-Manure" Crops.

Another way to improve garden soil is the use of "green-manure" crops, such as clovers, rye, alfalfa, barley, and so on. In fact, anything which will grow upon the land during the fall and winter. The clovers and the other closely related plants known as legumes, which have the power of gathering the free nitrogen from the air and storing it up in the soil are the most desirable. Green-manure crops should be turned under in early spring.

IMPORTANCE OF FARM DIARY

Among Other Things It Will Prevent Paying More for Things Than They Are Worth.

Record is Made.

By keeping a diary, the farmer can keep track of his expenses and income, and thus avoid paying more for things than they are worth.

PLAN TO ERADICATE DISEASE OF POTATO

Intensive Warfare Being Made to Stamp Out Wart.

Allment Usually Destroys Entire Crop When Tubers Susceptible to It Are Planted in Badly Infested Ground.

(Prepared by the United States Department of Agriculture.)

Although their efforts to eradicate the potato wart from the 100 acres or less in which it has been found in the United States are as yet inconclusive, pathological experts of the United States Department of Agriculture are continuing an intensive scientific warfare to stamp out the disease. The infection, which has been found in only 17 mining villages in Pennsylvania, West Virginia and Maryland, is one of the most stubborn with which the department has ever had to cope. Potato wart was introduced by importations of foreign potatoes prior to the establishment in 1912 of the federal quarantine prohibiting the importation

A Potato Sprayer That Covers Four Rows.

of potatoes from countries where the disease was known to occur. The disease usually completely destroys the crop when potatoes susceptible to it are planted in badly infested soil.

Soil sterilization tests by means of steam and chemicals were carried out in infested gardens in Pennsylvania and West Virginia in 1919 and 1920. The methods tested were: Live steam under an inverted iron pan; a solution of formaldehyde applied to the soil, both alone and in combination with steam; and the use of chemical solutions, including bordeaux mixture, mercuric chloride, and sulphuric acid. The worth of each method was tested by planting a susceptible variety of potatoes on the treated plots. None of the chemical treatments resulted in complete eradication of the disease, and steam sterilization, while it appeared to be successful in the small trial plots, involved such great expense and difficulty as to leave the practicability of eradication still in doubt.

Additional experiments will have to be carried out before specific recommendations can be made. Specialists hope, however, that some method of treating the soil by heat or chemicals can be devised which will make it possible to completely eradicate potato wart from this country.

The work will be actively carried forward until it is determined whether a satisfactory method can be found.

RAISE EGG STANDARDS

If all farmers and poultrymen would adhere strictly to the following rules in handling their poultry and eggs the quality of the eggs marketed would be much improved. Poultry specialists in the United States Department of Agriculture provide the rules:

1. Keep the nests clean; provide one nest for every four hens.
2. Gather the eggs twice daily.
3. Keep the eggs in a cool, dry room or cellar.
4. Market the eggs at least twice a week.
5. Sell, kill or confine all male birds as soon as the hatching season is over.

GRAIN ALLOWANCE FOR HENS

If Scattered in Litter Fowls Are Compelled to Take Necessary Exercise to Find It.

The backyard flock should have in addition to the table scraps a light feed of grain every morning. Four or five handfuls of grain—about one-half pint—scattered in the litter will be sufficient for a flock of 20 to 25 hens. By handful is meant as much as can be grasped in the hand. By scattering it in the litter the hens will be compelled to scratch in order to find the grain and in this way to take exercise, which is decidedly beneficial to them.

In case not enough good, sound, substantial table scraps are available to furnish full feeds, both at noon and at night, another feed of the grain mixture should be thrown into the litter at the night feeding and should consist of as much as the hens will eat up clean. Poultry specialists in the United States Department of Agriculture say: "In summer, during suitable weather the grain can be fed by scattering it on the ground outside the house. A good grain mixture for this purpose is composed of equal parts by weight of wheat, cracked corn, and oats. Another suitable grain mixture is composed of two parts by weight of cracked corn and one part of oats."

CALVES REQUIRE GOOD CARE

Young Animals Must Have More Than Food to Develop Into Most Productive Animals.

By giving calves good care, the farmer can develop them into the most productive animals.

GOOD ROADS

GRAVEL FOR ECONOMIC ROAD

Summary of Important Points Brought Out in Recent Address by Wisconsin Engineer.

Gravel roads are given a strong recommendation as economic highways by A. E. Hirst, Wisconsin state highway engineer. Not only so, but he is of the firm opinion that the economic service of gravel in other words, is proportionate to its worth. In other words, if a gravel roadway 18 feet wide has a life or service of three to five years, then the addition of 10 feet will increase its serviceable life to six or possibly ten years.

"These figures are not definite," says Mr. Hirst, "they merely express the comparison which is sought to emphasize. Moreover, this comparison does not hold true, nor is any broad assertion of the worth of gravel roads quite true unless there is continuous maintenance. Wherever gravel roads are giving notable service good maintenance is as much the reason as is good construction in the first place."

Mr. Hirst recently gave an important address on this subject and the following is a condensed summary of the main points in his discussion:

1. The prime factor in determining the relative service value of highways is whether they serve traffic effectively and inexpensively.
2. Preliminary traffic censuses are valueless as aids in pavement type selection.
3. Traffic counts have value only in giving information upon traffic changes, and operation costs over varying pavement surfaces.
4. What has been is no indication of what will be.
5. States must adopt uniform loads to be borne by roads of varying classes of importance.
6. All highways cannot be made 15-ton highways every day in the year.
7. Expressed in terms of real service value, type means little unless se-

Proper Maintenance Given to This Road.

lection of it is supplemented by proper design and layout.

8. The road problem is not to build a few boulevards but a transportation system.

9. We have thought too little about the basic function of highways—the offering of facilities for travel.

10. A striking feature of highway construction, reconstruction and maintenance has been an almost total disregard of comfort, convenience and economy of operation in the interests of the traveling public.

11. The new permanent thing about road work is proper grading on correct locations.

12. The highway user knows little about pavement economics; but he does know where and when he broke the last spring.

13. We have used too much mathematics and too little common sense.

14. Our owners demand service and service they must be given.

15. Maintenance is the keystone of the entire structure of pavement service.

REMOVE BLOTS ON HIGHWAYS

National Association of Gardeners Passes Resolution Concerning Use of Billboards.

The National Association of Gardeners passed a resolution at its last meeting concerning the use of billboards on highways and private property. Let's have more of these resolutions and more action against these blots on our landscape. Why not remove all material that litter the fences and trees near home?—Le Roy Cady, associate horticulturist, University farm, St. Paul.

MOTORTRUCK IS BIG FACTOR

Anything That Will Make Interurban Transportation More Efficient Is Advantageous.

Motortruck operation is just beginning to make itself felt as a factor in lowering food prices, and everything that will make truck operation more efficient, especially for interurban transportation, will be of a decided advantage to all of us who have to eat.

Tar Macadam Satisfactory.

For laterals or main roads in sparsely settled country where traffic is not heavy and when the amount available for road construction is not large, tar macadam highways are quite satisfactory.

Bad Roads Retard Marketing.

Bad roads retard marketing of products and generally have brought about a loss of business.

LIVE STOCK FACTS

RAISE ORPHAN FOAL BY HAND

Not Uncommon for Mare to Die, Leaving Youngster Dependent on Artificial Feeding.

It is not uncommon for a mare to die shortly after foaling, thus leaving her foal dependent on artificial feeding for its sustenance; and some mares furnish an insufficient amount of milk for their colts. Cow's milk furnishes a most logical substitute for mare's milk, but as the composition is somewhat different, certain changes or modifications are necessary in order that the supplied diet be not too dissimilar from the natural. The following table of percentage gives the average composition of the two kinds of milk:

Water Protein Fat Sugar Ash

Cow's milk, 87.1 1.6 3.3 4.8 0.2

Mare's milk, 80.7 1.9 12.1 4.8 0.1

Milk from a fresh cow is possible and which is not rich in butterfat should be diluted about one-fourth with fresh water. A table-

spoonful of sugar and about 3 table-

spoonfuls of lime water should be added for each pint. This mixture should be supplied to the colt at about body temperature. A bottle with a rubber nipple, or even a finger of a kid glove with a fair-sized hole in it fitted over the end of a spout of a vessel such as a teapot, will serve as a convenient utensil in getting the foal to take the milk. If the finger of a kid glove is used it should be as clean as possible. At first about one-half a cup of milk should be given every hour, the quantity to be increased slightly and the intervals to be lengthened gradually as the foal grows older. In about 2 months skimmed milk may be substituted for whole milk, and in addition one of the following rations should be fed: One part of flaxseed meal, 2 parts of bran, 2 parts of corn meal, one half-part, flaxseed meal, 1 part of bran, 2 parts of corn meal, and 1 part of oil meal. Feed a double handful a day to start with, and increase the amount gradually.

Raising a foal by hand is not a job for the careless and indifferent. It requires patience, painstaking care, perseverance, judgment, and cleanliness. The vessel in which the milk is supplied should be scalded thoroughly each time it is used. Udder receptacles for the milk and irregular intervals for feeding likely will cause scours. The quarters should be very clean and the orphaned foal should have company of some kind. Another foal is desirable, but even a calf is better than no company. A grassy paddock with abundant shade, fresh water and protection from flies will increase the orphan's chance of proper development.

Patience, Perseverance and Judgment Are Necessary in Raising Orphan Foal.

WIFE TAKES HUSBANDSADVICE

And Is Made Well Again by Lydia E. Pinkham's Vegetable Compound

Springfield, Mass.—"The doctor told my husband that I had to have an operation, otherwise I would be a sickly woman and could not have any more children on account of my weakened condition. I refused to have the operation. My husband asked me to try Lydia E. Pinkham's Vegetable Compound to see if it would not help me. For the first four months I could do but little work, had to lie down most of the time, was nervous and could eat hardly anything, but my husband was always reminding me to take the Vegetable Compound, which I did. Of my eight children this last one was the easiest birth of all and I am thankful for your Vegetable Compound. I recommend it to my friends when I hear them complaining about their ills." —Mrs. M. NATALIE, 72 Fremont St., Springfield, Mass.

Sickly, ailing women make unhappy homes, and affect the health of their letter one can imagine how this home was transformed by her restoration to health. Every woman who suffers from such ailments should give Lydia E. Pinkham's Vegetable Compound a fair trial. It is surely worth while.

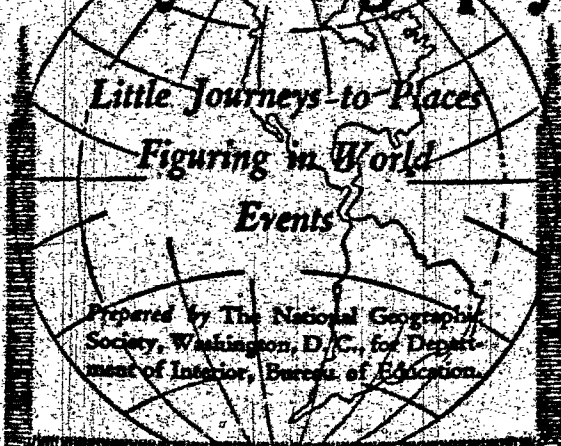

Renew your health by purifying your system with

Quick and delightful relief for biliousness, colds, constipation, headaches, and stomach, liver and blood troubles.

The genuine are sold only in 35c packages. Avoid imitations.

Today's Geography

ASIATIC PROVINCE OF ANCIENT GREECE

The province of Smyrna, on the coast of Asia Minor, was placed under Greek administration following the World War, and has been the scene recently of fighting between Greek and Turkish nationalist forces.

The basis for Greek claims to the Smyrna district in Asia Minor is put forth in a statement which former Premier Venizelos of Greece is reported to have made to the supreme council of the allies. "We seek no mandate, we seek to enter our home," Smyrna, and the remainder of the west coast of Asia Minor, which have been accepted as Turkish with little question for many generations, had a well-developed Greek civilization and culture when the ancestors of the Turks, half-civilized nomads, were still wandering with their flocks over the bleak steppes of central Asia.

The portion of the province of Smyrna which has been occupied by Greek forces comprises roughly old Ionia, a country which was as purely Greek as Attica itself, and parts of Aegolis, another Greek country adjoining Ionia on the north. Greeks, possibly from Crete or other islands of the Aegean, are supposed to have settled in Ionia shortly after the Trojan war. The cities which they built in this favored land of sunny mountain slopes, fertile valleys, and good harbors were thriving and wealthy marts of trade and centers of culture eight hundred years or more before the time of Christ, when they are first heard of in recorded history.

Smyrna is one of the cities which claims to be the birthplace of Homer, and tradition even points out a cave near the city in which he is said to have composed many of his poems. Sappho was born in Asiatic Greece and maintained a school in one of its cities. Sculpture, painting, and practically every phase of the Greek art which has delighted later generations and served as their models had its beginning in Asiatic Ionia, and flourished there before coming to full flower in Athens and the other cities of European Greece. Ephesus, where that world wonder, the temple of Diana stood, was not far from the present city of Smyrna, and a dozen more of the great cities of the early Greeks were near by.

The modern province of Smyrna is the most favored of all the provinces of Asia Minor. It contains three of the most considerable rivers of the country, including the Meander, whose serpentine course has given the English language an expressive verb. Fertile soil and temperate climate have added to the region's attractions, while the possession of a port and city—the city of Smyrna—unequaled by any other in Asia Minor has contributed another immeasurably important asset. Though imperfectly tilled during its control by Turkey, the province of Smyrna has nevertheless been noted for its fine fruits. For a long time it has furnished the best figs and raisins which reach the markets of Europe.

HUDSON BAY: WHERE U. S. NAVAL BALLOONISTS ALIGHTED

In coming to earth near Moose Factory, at the southernmost point of Hudson Bay, pilots of the United States naval balloon which in the closing days of 1920 was blown from New York city to the frozen North in relatively a few hours, stumbled on a country rich in the history and traditions of the picturesque old Hudson's Bay company.

Henry Hudson—"Hendrick" Hudson to his Dutch employers—was responsible, strangely enough, for putting on the map both the starting and ending point of this recent chance balloon trip. In 1609 he anchored his famous "Half Moon" close to the present location of New York's Goddess of Liberty and the following year, still searching for the elusive Northwest Passage, he sailed into Hudson Bay and followed its eastern shore south to near the present Moose Factory.

It was there in James Bay, the shallow southern arm of Hudson Bay, that Henry Hudson suffered the keenest of disappointment that can come only to the world's great dreamers. His dream was to find a passage to the "South Sea," and therefore a short cut to India. When he sailed into Hudson Bay and found that it was a great body of water he was sure his dream was about to be realized. But when he reached the shallow James Bay, and nosing across found that there was a great west coast to the great expanse of water, his dream came to an end.

It was on the shores of James Bay that Hudson and his surly crew wintered following his discovery, and only a short distance to the north that the great explorer met his tragic end next spring, when, bound by mutineers, he was set adrift in a small boat with a handful of sick men, to perish.

"The Company of Gentlemen Adventurers Trading to Hudson's Bay," which carved dominion for Great Britain across North America, established its first post near Moose Factory soon after King Charles II signed its charter in 1670 and blithely made its members "true and absolute lords" of three-quarters of a continent, vested them with trading monopolies, rights to pass laws and impose punishments, and even gave them power to make war on non-Christian peoples.

During the three and a half centuries since that time Moose Factory has remained one of the important posts of the Hudson's Bay company, gathering a rich harvest of furs. It was the scene of many raids and counter raids in the early days between the French and the company's employees.

Ching-eh-chen, possibly a stranger city to the average American, needs only this introduction: "It is the home of chinaware."

It is the subject of the following communication to the National Geographic society from Frank B. Lenz: "The greatest industrial city of China is not one of the treaty ports, where the direct influence of western progress is constantly felt, but a bustling interior city of Kiangsi province—Ching-eh-chen. This is the famous porcelain and pottery center of the nation—indeed, it is the original home of the porcelain industry of the world. There are few cities in America or Europe that are so completely given over to a single industry as this one.

"Chinaware! What does the word connote? It is simply a ware made of clay and named for the country that first produced it. Whether it be a green tile from a temple roof, a dish, a vase, or a painted ornament from a wealthy Celestial's home, it all has a traceable connection with Ching-eh-chen. With the Chinese, Ching-eh-chen and porcelain are synonymous.

"Ching-eh-chen (Town of Scenic Virtue) is one of the four largest towns (as distinguished from cities) of China. Technically, it is a town, because it has no wall. In reality, it is a busy industrial city of 800,000 people, two-thirds of whom are engaged in the manufacture and sale of porcelain. Romantically, it is a city to stir men's souls. Longfellow, in his 'Keramos,' speaks of it.

"The geographical location of Ching-eh-chen is not accidental. It became the pottery center of the country centuries ago because of the enormous quantities of excellent clay in the district around Pe Yang Lake. More than a dozen kinds of excellent clay are found in the neighborhood of the lake.

"After the clays are thoroughly cleaned, sifted, and refined they are kneaded together in varying proportions, usually by a bare-chested boy, until they are ready for the potter. The wet lump of clay is then placed on the knob of the potter's wheel.

"The potter's wheel, which was invented by the Chinese, is a huge circular machine, about four feet in diameter, made of heavy timbers to lend it momentum. It rests on a perpendicular axis in a slight depression, or pit, into which water and debris rapidly drain.

"The potter is perched above the wheel, with one foot on either side, in order to allow sufficient space for the movement of his hands. After revolving the wheel swiftly with a short pole, he deftly and with mechanical precision fashions a plate, bowl, or vase. After years of practice he can estimate to within a hair's breadth the proper size.

"The piece is then removed and placed on a long tray in front of the potter where it awaits the next artisan. Handles and other decorations, made in molds, are added, and then the whole is scraped smooth and allowed to dry until it is ready for the next process—the under-glaze decoration.

"Several basic colors, like blue and red, can be painted on under the glaze. The glaze is next applied in various ways—by dipping, by blowing on with a tube, or by sprinkling. After the mark has been added the piece is ready for the furnace.

"The result of the war and the breaking up of Russia and the giving rein to the principle of self-determination of racial units have created a number of independent European states in central and eastern Europe. Of these, the Baltic provinces, and Poland, as well as the Czech, Slovak state and the Jugoslav state, have many Jewish citizens. In addition to this the Greater Rumania is another state which has many Jewish citizens.

"The German treaty specifically provides that the five great powers shall make future treaties with Poland and with the Czech-Slovak state, securing the religious liberties of the people who constitute a minority in those states.

"That's Right. A measure which aims to teach the children how to play appears to be not without merit when the schools are being urged to do so much that probably does not add to the joy of youthful life. —Boston Transcript.

plants using ancient methods were erected in Fort Worth, Texas, to treat the gas of the Petrolia field, and some months later a third plant, using a still different method, was erected in the field itself.

"As the apparatus used in all the processes of extracting helium gas for balloon purposes requires rather delicate adjustment and manipulation, some time was naturally consumed in determining the most efficient working conditions; but just prior to the armistice the first shipment of 150,000 cubic feet of helium, compressed and stored in steel tanks, had been started to Europe. This was enough to fill four of the ordinary kite balloons, though large dirigibles require one to two million or more cubic feet of gas.

"Although quantity production of helium was achieved just too late to be of value in the actual hostilities, it was in itself a great accomplishment for the world's total output of helium up to 1915 was probably less than 100 cubic feet, the market value of which was about \$1,700 a cubic foot. Our helium can be produced by the first two methods developed at less than 10 cents a cubic foot, and if the third process fulfills expectations, this figure will be still further reduced.

"The details of the process of extracting helium are highly technical, but the general scheme is easily understood. All of the main constituents of natural gas, including the nitrogen, become liquefied when cooled to about minus 228 degrees Fahrenheit, but the helium remains a gas at this exceedingly low temperature and is thus easily separated.

JEW AND THE WORLD WAR

The development of Palestine under its administration as a Jewish homeland renews interest in the part played by Jews in the late war and how the war affected them. In a communication to the National Geographic society, former President William Howard Taft says:

"One-half the Jews of the world have had to bear its miseries, its cruelties, its sufferings. They lived in the theater of war between Russia and Germany and Austria. In this region, almost without ceasing, the campaign continued. The Russians laid waste the country in order to embarrass their pursuing enemies, and between the two armies the population, of which the Jews were a large part, suffered untold horrors.

"As soon as the war came on, as soon as mobilizations were initiated, Germany and Austria, on the one hand, and Russia, on the other, vied with each other in a cultivation of the goodwill of the Poles and the Jews.

"Russia promised that an autonomous Poland would be created from all three of the partitioned tribal districts of the partitioned kingdom. Some of the leaders of the Austrian government announced an intention of giving autonomy to Galicia.

"When the war came to an end, tremendous governmental changes occurred in the countries where the Jews are so greatly congested.

"The dreadful destruction of life, the necessity for rehabilitation of these countries, where the war raged with such violence and destruction, must necessarily give greater economic value to every man who survives.

"The loyalty which the Jews have shown to their respective governments in these countries under a host of trying and oppressive conditions, their earnestness with the claim that they must be equal treatment.

"If education and opportunity and freedom and equality are extended to them in the next generation, the traits to which objection has sometimes been made will become less and less conspicuous, and Russia's great domain, which needs people of energy, people of keenness, people of enterprise, people experienced in trade, people of financial genius, will find a benefit in the presence of the Jews.

"From the East-End of New York and through centers of population in this country where Jews are gathered by the million and hundreds of thousands, come the youth of the race who soon manifest a spirit of Americanism and get on.

"They cultivate little or no solidarity in politics and they manifest a disposition to disintegrate as a community. They retain a loyalty to the race, but not a strict adherence to the ceremonial, and they intermarry with Gentiles.

"The Jews of the world, in countries where they have had equal opportunities, have won their way not only to great financial power, but to places of commanding influence in journalism, in the professions, and in business. They have retained always an acute interest in the welfare of their co-religionists throughout the world. Their religious training has inculcated in them the duty of charity to all Jews and Gentiles.

"The result of the war and the breaking up of Russia and the giving rein to the principle of self-determination of racial units have created a number of independent European states in central and eastern Europe. Of these, the Baltic provinces, and Poland, as well as the Czech, Slovak state and the Jugoslav state, have many Jewish citizens. In addition to this the Greater Rumania is another state which has many Jewish citizens.

"The German treaty specifically provides that the five great powers shall make future treaties with Poland and with the Czech-Slovak state, securing the religious liberties of the people who constitute a minority in those states.

"That's Right. A measure which aims to teach the children how to play appears to be not without merit when the schools are being urged to do so much that probably does not add to the joy of youthful life. —Boston Transcript.

The Kitchen Cabinet

(© 1921, Western Newspaper Union.)

There are those who cannot look upon the tree in its autumn glory without seeing the bare skeleton behind; but they must learn to look longer, and they will see that the branches are already covered with next year's buds. —J. Arthur Thompson.

WHOLESALE GOOD THINGS.

For an emergency dessert, if you have a few cream puff shells at hand or near enough to purchase on short notice, is cream puffs shells filled with vanilla ice cream and served with a hot chocolate sauce.

Chocolate Sauce.—Take three-fourths of a cupful of sugar, one-fourth cupful of water, one-fourth cupful of seeded raisins, chopped. Boil together for five minutes, remove from the fire and add one-fourth of a teaspoonful of almond flavoring.

Apple Turnovers.—Make apple sauce according to taste, seasoning with lemon and a dash of cinnamon, add a small lump of butter. Cook the sauce until very thick. Place a spoonful of this sauce on a square of pastry, pinching the corners together after wetting them. Bake in a hot oven, until the pastry is well done. Serve with cream and sugar, either hot or cold.

Pecan and Pineapple Cake.—Cream together one cupful of butter and two cupfuls of sugar, add two cupfuls of baking powder, alternately with one-half cupful of milk, adding a pinch of salt. When all the ingredients are well mixed, fold in the stiffly beaten whites of six eggs.

Bake in two layers. For the filling, put two cupfuls of shelled pecans through a meat chopper and mix with one cupful of shredded pineapple. Stir with the unbeaten whites of two eggs enough powdered sugar to make a thick paste and mix with the nuts and pineapple. Use as filling and for the icing on top of the cake, decorating with halves of the nut meats arranged in a border while the icing is still soft.

Reflect upon your present blessings, of which every man has many, not on your past misfortunes, of which all men have some. —Dickens.

WHOLESALE DESSERTS.

A dessert which may be given the children with freedom is baked apples in various ways; the following will be found a little different from the usual manner of serving them.

Individual Baked Apples.—Use the small glass baking dishes. Cut apples in quarters and remove all the core. Set the apples in cups to resemble a whole apple. Fill the center with pieces of figs, dates or raisins. Add to each cup one tablespoonful of water. Bake until tender. The skin is not removed from the apple. Serve hot or cold with cream and sugar.

Ginger Cream.—Soak three-fourths of a teaspoonful of gelatin in one tablespoonful of cold water. Make a custard of one egg, one tablespoonful of sugar, six tablespoonfuls of milk, a pinch of salt, beating all with an egg beater. Cook over water until the spoon is coated, then add one tablespoonful of minced Canton ginger and two tablespoonfuls of syrup; add the gelatin to the hot custard and when thick stir in one-half cupful of whipped cream. Pour into molds and chill.

Lemon Crumb Pie.—Grate the rind and take the juice of a lemon. Mix two tablespoonfuls of butter with five tablespoonfuls of sugar. Stir the sugar mixture into three-quarters of a pint of hot milk, and cool; add the yolks of three eggs, well beaten, and the lemon juice and rind. Line a pie plate with an inch layer of buttered crumbs and pour in the mixture. Cover when baked and firm with a meringue made from the whites. Brown in the oven and serve cold.

Nut Mince Pie.—Mix together in the order given the following ingredients: One-half cupful of chopped walnut meats, one-half cupful of seeded raisins, one cupful of chopped apples, one-half cupful of dark corn syrup, one-fourth of a cupful of either vinegar, molasses, one-half teaspoonful each of allspice and cloves and one teaspoonful each of cinnamon and salt. Add enough crushed crackers to make of the right consistency and fill a lined plate with the mixture. This makes a large pie.

Ginger Puffs.—Shape and bake the balls one and one-half inches in diameter, bake and fill with whipped cream sweetened with ginger syrup, adding some of the ginger chopped in small bits. Flavor with a few drops of vanilla. Sprinkle with powdered sugar and serve.

Mistake Made by Many. Too many people take themselves too seriously, and can't understand why their estimates of themselves are not accepted by others. Consequently they "take it out" on others when they might do much better by taking some things out of themselves. There's too much personal "inflation."

THE SEA COAST ECHO.

C. G. Moreau, Editor and Publisher.

Official Journal of The Board of Supervisors, Hancock County, Miss.

Official Journal of Board of Mayor and Aldermen, Bay St. Louis, Miss.

CITY ECHOES.

—Mr. G. E. Temple, optometrist, and proprietor of the Bay Jewelry Store, was a business visitor to New Orleans Thursday.

—Mrs. John Osoinach has returned from Memphis, Tenn., where she attended the Osoinach-Yager wedding and from Brookhaven where she visited her daughter, Lucille, at Whitworth College.

—Mrs. W. H. Pickett and pretty little daughter, are here from Albuquerque, New Mexico, visiting at the home of Mrs. Pickett's brother, Mr. M. E. Ansley and family, on the beach front.

—Misses Maria Ferris and Mary Ellen Burns, who have been accomplished guests of Mrs. C. C. McDonald, returned to their home in Nashville, Tenn., during the early part of the week, regretted by the many friends and acquaintances formed while here. Mrs. McDonald also had as her guest for a short while Miss May Ahern, of New Orleans.

—Among the prominent summer residents from New Orleans in Bay St. Louis this season are Mr. and Mrs. O. J. Key, Jr., the latter a most valued attaché of the firm of Clay & Gilbert of the big city. The Key family well-known in New Orleans, where they have numerous friends, and their circle of local acquaintances will keep abreast of the times.

—Mrs. Thomas B. Norton has had as her guest the past few days her sister, Mrs. Walter B. Wellborn, of Atlanta, Ga., enroute to Los Angeles, California, where she will remain for the summer visiting her sister, Mrs. L. N. Brunning, at the family chateau in West Adams Boulevard, and who will probably return home with her and visit Bay St. Louis while South.

—The Mississippi State Press Association will meet in annual session at Greenwood next Tuesday, Wednesday and Thursday, one of the largest meetings in the history of the association is expected. The Sea Coast Echo will be represented by its publisher and wife, who leave tomorrow night, to be absent a week, expecting to extend their visit to Memphis, Tenn.

—Mr. George R. Rea, cashier of the Merchants Bank, accompanied by Mrs. Rea, returned home yesterday from Vicksburg, where they attended the annual session of the Mississippi State Bankers' Association, of which Mr. Rea is a member of the Executive Committee. The convention was largely attended and its deliberations were important, touching the many vital issues of the day, in which the banks and people are concerned. While away Mr. and Mrs. Rea visited relatives at Wesson and near Greenville.

—Miss Willie Dill Ansley, pretty and attractive young daughter of Mr. and Mrs. M. E. Ansley, was taken to New Orleans Tuesday night and immediately operated on for acute appendicitis. Dr. Danna performing the operation. The patient underwent the ordeal successfully, but had a very close call, her condition prior to entering the operating room having become aggravated. However, reports from Hotel Dieu are to the effect all imminent danger has passed, and an early recovery is now anticipated.

—A large number of members, accompanied by a number of candidates, of Bere LeDuc Council, Knights of Columbus, Bay St. Louis, will attend the initiation of a class of over fifty candidates at Biloxi tomorrow, and at which place it is expected over one thousand persons from New Orleans, Mobile and intermediate points along the Gulf Coast will be present. A special K. C. train from New Orleans and one from Mobile will make the trip to and from Biloxi for the occasion. The initiation will be preceded by a monster parade, and special services at the Church of the Nativity. A banquet will follow during the evening hours, and the Mobile Council at night will give a complimentary musical performance. Grand Knight Jos. O. Mauffray and many other members from the Bay will attend.

—Tentative plans for a system of water works for the city of Bay St. Louis were received and filed by the Board of Mayor and Aldermen Saturday afternoon at the regular monthly meeting of that body. As will be noted elsewhere in this issue of The Echo, by reference to the official minutes of the council, a special election has been called of the voters of the city of Bay St. Louis to determine whether the city shall own its water works and thereby in turn gain a revenue. The plans are on file at the city hall and open to the public inspection.

—The management of the local division of the L. & N. R. R. system is to be congratulated and complimented as well on the beautiful new rolling stock it has put in commission. The evening coast trains are veritable things of beauty and the very last word in coach construction. The coaches are equipped with electric lights and fans, and every convenience imaginable, has not been overlooked. The seats are of a new type, roomy and comfortable. In fact, every element of comfort and luxury, and safety as well, seems to have been combined in the new trains, and the system will encourage travel considerably.

—The city's truck and water wagon have undergone a thorough renovation and painted as new, and the different city vehicles on the street attract considerable attention. Mayor Welch is not only interested in the appearance of things, but has in mind the taking care of the city property, which is so essential to resist the wear and tear of usage. There is nothing like keeping one's house in shape, Mayor Welch's disposition is prompted from that sense of responsibility which he unflinchingly practices at all times to the interest of the taxpayers. They are like Jones—they pay the freight.

—The meeting of the Bay St. Louis local committee was held on Tuesday night at the Hancock County Bank for the purpose of furthering the proposition of building a big hotel, and discussed the subject from many angles that presented itself. The committee was finally resolved that a meeting of three village New Orleans the following day (Wednesday) to confer with hotel men of that city, and also, if possible, to get the courtesy of the floor of the Greater Convention in an effort to get party or parties in the hotel business financially and actively interested. Messrs. R. W. Webb, Edw. J. Schwartz and Carl Marshall were appointed and took the trip. They were given the opportunity of addressing the convention, and already have several parties in the hotel business interested in the project, and more is to follow as a result of their trip and interview. The committee at Tuesday night's business session, composed of Leo W. Seal, Edw. J. Schwartz, E. J. Leonard, E. E. Lucas, R. C. Engman, Walter Gleason, Chas. Wright, Edw. J. Weston, Carl Marshall, John Terrell, Perkins, A. Batistella, John Osoinach, J. O. Mauffray, R. W. Webb, C. G. Moreau.

—News was received in this city Monday night that Mrs. Joseph Combel had died that afternoon at her home in Lafayette, La., following an operation for appendicitis. This intelligence was received with much sorrow. She was a native of Bay St. Louis, having married in this city and resided and reared a large family here. Some years ago the family moved to Biloxi, and about two or three years since removed to their new home in Louisiana, where Mr. Combel is in business. The remains were conveyed to New Orleans, the funeral taking place Tuesday afternoon from the residence of Raoul Combel, a son, and interment at Greenwood cemetery. Mrs. Combel was 65 years of age. Her death removes a most estimable woman, a devoted wife and mother. The bereaved relatives have the sympathy of their many friends in Bay St. Louis where they resided for many years and are possibly best known, and well loved.

SPLENDID REPORT BY EXECUTIVE SECRETARY.

Mrs. M. C. Gager, executive secretary Information Bureau K. of C., has handed in her report for months of April and May, which represents active and telling service. This will appear in full in next week's Echo, crowded out this week for lack of room. Watch for it.

—Graduation exercises of the Bay High School took place last night at the W. O. W. Hall in the presence of a large and select audience. The Class is composed of Bertrand Jackson, Ethel May Osoinach and Randolph W. Firsching. Their orations were unusually excellent and the delivery of each was splendid.

Social Events.

Dr. and Mrs. J. A. Evans were host and hostess Saturday evening at the Tea Room, entertaining at a dinner of eight covers in compliment to Mr. and Mrs. C. C. McDonald and their house guests, Misses Maria Ferris, Mary Ellen Burns, of Nashville, Tenn., and Miss May Ahern, of New Orleans. The decoration scheme of yellow was carried out in every detail and the affair was cleverly planned and executed. Mrs. Evans is one of the younger matrons whose social affairs are always referred to in charming terms, and this occasion was no exception.

The tea garden annex to the Tea Room was the scene of a large and semi-formal guests Tuesday afternoon, when Mrs. Leo W. Seal entertained at a dinner bridge. There were quite a number of tables and the many guests indulged in the fascinating game until a late hour. A two-course luncheon was served at the conclusion of the contest, and delicious punch served at frequent intervals during its progress. Mrs. Seal's entertainment of so many charming friends was exceedingly delightful and her gracious attentions as hostess added largely to its success. The tea garden was inviting with its lavish decorations of green foliage, profusion of growing ferns and plants, and the color of the flowers added perceptibly to the attractiveness and beauty of the place. Among those present were: Mrs. W. J. Harrison, Mrs. C. C. McDonald, Mrs. J. H. Bouslog, Mrs. Will T. McDonald, Mrs. Donald Marshall, Mrs. C. L. Waller, Mrs. Bell, Mrs. Carl Marshall, Mrs. Owen Crawford, Mrs. C. A. Fournier, Mrs. J. N. Wisner, Mrs. C. G. Moreau, Mrs. R. de Montluzin, Mrs. Elliott, Mrs. Terrell Perkins, Mrs. H. Perry, Mrs. H. A. Firsching, Mrs. Arthur Tipping, Mrs. Borden, Mrs. E. Leonard, Mrs. J. A. Evans, Mrs. C. L. Horton, Mrs. W. J. Chapman, Mrs. P. J. Jones, Misses S. Briggs, L. Cuneo, Elsie and Hilda Spori, Isabelle Desimone, May Ahern of New Orleans and E. Edwards.

Mr. and Mrs. George C. Firsching were host and hostess on Tuesday evening at their home on the beach, front to an elegant dinner in compliment to the Bay High School graduates, of which their son, Randolph Ware Firsching, is an honored member. The class colors of maroon and white and the class flower, pink rose, were in evidence and displaying much taste on all sides of the dining room, and the favors and other decorations were in harmony with the color scheme. This auspicious occasion was fittingly celebrated, and the unbounded hospitality of Mr. and Mrs. Firsching and the many attentions of the evening combined to make the affair a most enjoyable one.

Mr. and Mrs. C. G. Moreau entertained at a dinner of twelve covers on Wednesday night at the Tea Room in compliment to the graduates of the Bay High School, Miss Ethel M. Osoinach and Messrs. Randolph Ware Firsching and W. Bertrand Jackson. In addition to the class members there were present the parents and Miss Hermie Perkins of Class '22. The keynote of the decorations was the class flower, pink rose, and this flower and color predominated. A number of addresses were among the features of the evening, not omitting the fitting and ably prepared address of young Firsching on behalf of the Class.

Mrs. R. W. Sistrunk has issued invitations to an informal bridge party at her home in Citizen street for next Tuesday afternoon, in compliment to her mother, Mrs. S. Anderson, who is here on a visit from Florida.

DR. J. H. SPENCE, DENTIST.

Office Gex Building, Main St. Hours 10 a. m. to 5 p. m. Monday, Wednesday, Friday. Phone 138.

—The L. & N. R. R. Company has an official notice elsewhere in this issue of The Echo, calling the attention of mariners and others to the fact that the Biloxi back bay draw bridge will be closed during a given period pending the putting in of a new structure under the supervision of J. A. Catchot, head of bridge construction for local division, a large force of men have been working for some weeks. Water traffic will be closed from May 23rd to June 3rd. The weathered The Echo is informed, is of a heavier and better type, and its building is in line with the Company's new policy to have all bridges in time of the strongest construction possible. This is a part of the improvements planned by the executive to be paid out of the million of dollars the company has borrowed.

—The Mississippi Oyster Commission, of which W. A. McDonald, of Bay St. Louis, is an active and valued member, has been engaged in considerable planting along the coast the past several weeks to an extent the like has not been witnessed heretofore, and which should improve the catch of oysters abundantly to assure proper season next fall. The Commission has completed its work upon the reefs of Biloxi and West Pascagoula at a cost of \$1,700. On the Pascagoula reef 4000 barrels were planted on the Biloxi reef. The plan is to make the reefs along the coast to the maximum extent. The industry is of incalculable benefit to our people, to say nothing of the vast revenue to the State, which receives its stipend upon every barrel of the bivalves fished from the local waters. The Commission recognizes and realizes this fact and its efforts to develop the industry fully is gratifying to note.

—Tomorrow will witness perhaps the largest crowd yet assembled in Bay St. Louis to visit a ball game, the New Orleans Marine League. The team will cross bats on the local diamond with St. Stanislaus College. Many friends of the New Orleans team will make the trip to Bay St. Louis, two coaches chartered to convey the crowd. A jazz band will accompany the team. The game will begin at 2:30 o'clock sharp. The Marines have tied or second place in the New Orleans Bankers' League, and "some class" game is expected. The Marine Bank Rotors' Club is a numerous and lusty bunch, able to hold their own in any game, and this ought not to be a disadvantage to the representation of the Bay St. Louis rotors that ought to be on the field tomorrow. There is no doubt Bay St. Louis should feel a debt of gratitude to S. S. C. for bringing so many and prominent teams to this city and the accompanying visitors and the fact, too, that the College management endeavors at all time to have the games played home. An earnest of appreciation can best be given by a large attendance tomorrow afternoon.

CARD OF THANKS.

Although it was the event of our daughter's death in the hour of our greatest bereavement, we could not overlook the generous sympathy and kindness extended to us by friends and acquaintances. Words are inadequate to express our thanks and deep feeling towards those true and noble friends that strived to reconcile us to the fact that God always acts for the best.

We desire to particularly mention the respect shown by the management of the Victory Airplane in eliminating their usual musical program. It is a great consolation to think of all this, and all our friends can be assured that we will never forget and will always carry these kindnesses to our hearts.

MR. AND MRS. S. MANIERI.

NOTICE OF TRUSTEE'S SALE.

State of Mississippi, Hancock County. Whereas, Victor Covacevich, et ux executed a deed of trust, dated October 2nd, 1918, which is recorded in Volume 12, page 249, Records of Mortgages and Deeds of Trust on Land conveying unto E. H. Hoffman, Trustee, for the purpose of securing an indebtedness owing by the said Victor Covacevich and Louisa Covacevich to E. H. Hoffman, of Bay St. Louis, Miss., the land in Hancock County, Miss., described as follows:

Having a front of 50 feet on the northern line of Julia street, and running back between parallel lines, 50 feet apart on a course north 20 degrees east, 100 feet, more or less to the Southern line of land now owned by S. M. Hyer; bounded on the north by land of S. M. Hyer on the East by land of the Methodist Church, South by Julia street, and West by land of Louisa Covacevich, is now assessed as Lot 38, First Ward, as per map of said city made by L. J. Henderson, filed in the office of the Chancery Clerk on January 6th, 1921, being the same land conveyed by William J. O'Connell, et al., to the undersigned, Victor Covacevich by Deed dated October 22, 1920, recorded in Volume 7, pages 183-184, records of said County.

And Whereas, the said J. A. DeMontluzin, under the power given him in the said deed of Trust, has substituted the undersigned, A. A. Kergosien, as Substituted Trustee, instead of E. H. Hoffman, which substitution is dated May 13, 1921, recorded in Book 15, page 274, of the Records of Mortgages and Deeds of Trust on Land, and default having been made in the payment of said indebtedness and said J. A. DeMontluzin having requested the undersigned to foreclose the same for the purpose of paying said indebtedness and costs.

Now, Therefore, notice is hereby given that I will sell said land at public outcry to the highest bidder for cash before the courthouse door of said county in the City of Bay St. Louis, within the lawful forty-day period, Monday, June 5th, 1921.

For the purpose of paying said indebtedness and costs. This the 15th day of May, A. D. 1921. A. A. KERGOSIEN, Substituted Trustee.

Package Car Service

Do you know the meaning of package car service for the handling of L. C. L. Shipments? (less than carload) and how you are individually served by this plan of the railroads to quicken the delivery of smaller packages and lower the carrying costs?

The package car is a development of the freight service which permits merchants or individuals to ship not only to nearby points but over comparatively long distances, any article (perishable or otherwise) for prompt delivery. The package car gives substantially the same service as is obtained by carload shippers.

These package cars are scheduled so as to be of greatest convenience to the shipper and consignee and they are largely used by the general public for shipment of small household effects and the like, as well as by commercial houses for general merchandise.

This information is published by the Louisville & Nashville Railroad as part of an informative campaign of publicity and in order that the public in general may become better acquainted with the advantages of the package car.
